

Evidence for the Existence of God

The Connection between DNA and Human Language

DNA is the Genetic Code that gives instruction for the appearance of every living Organism.
It is the blueprint for every living thing that has ever existed!!
But does it have an Author or is it randomly formed?

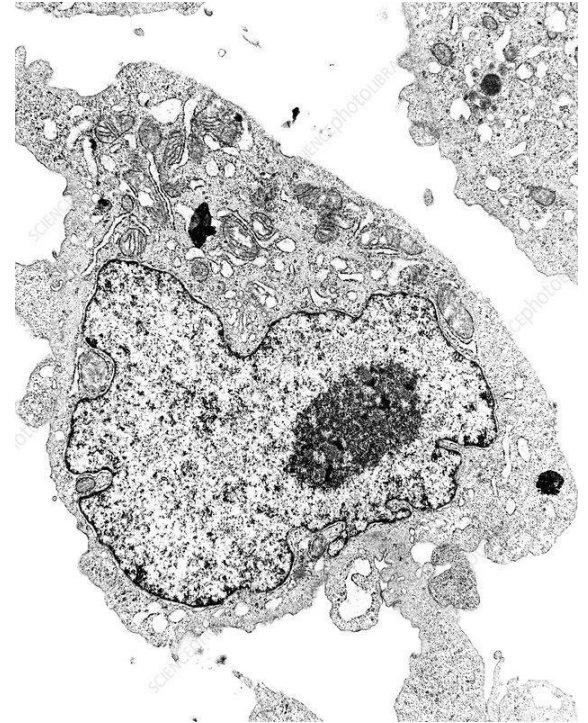

“DNA is like a computer program but far, far more advanced than any software ever created.”

Bill Gates, *The Road Ahead*

PROVERBS

	Prologue to Wise Living The fear of the LORD is the beginning of knowledge. (1:7) <i>CHAPTERS</i> 1–9	Principles for Wise Living The fear of the LORD is the instruction for wisdom, / And before honor comes humility. (15:33) <i>CHAPTERS</i> 10:1–31:9	Personification of Wise Living Charm is deceitful and beauty is vain, / But a woman who fears the LORD, she shall be praised. (31:30) <i>CHAPTER</i> 31:10–31
Emphasis	Wisdom especially for youth	Wisdom for all	
Framework	Subjects and statements	People and problems	Counseling and correction
Style	A book filled with short statements that declare a profound truth providing wisdom for life		
Theme	The fear of the LORD is the beginning of wisdom. (9:10)		
Key Verse	9:10		
Christ in Proverbs	Wisdom is incarnate in Christ "in whom are hidden all the treasures of wisdom and knowledge" (1 Corinthians 1:24, 30; Colossians 2:3).

Can Photocopy Originals

DNA can Self-Replicate
with an error factor of 1 in 10 billion!!

There must be a God who has made DNA, this self-replicating system that codes for all the traits of all the organisms who have ever lived on earth.

There are now existing between 2-3 million species that have been identified, each with their own unique number of chromosomes and purpose in their ecosystem.

Since language cannot exist without a mind to make language that codes for meaning, then there must be a language maker, and there must be a God!

DNA AND THE EXISTENCE OF GOD

WHAT IS A BLUEPRINT?: A blueprint can be defined as: a complete plan that explains how to do or develop something: Any well built machine, building, structure or mechanical gadget needs to have careful planning and detailed blueprints.

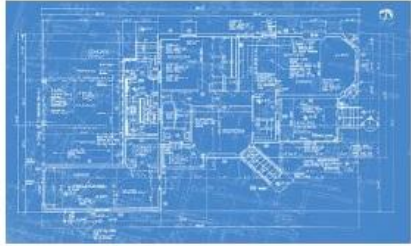

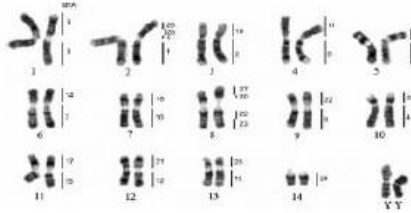

CONCEPTUAL IDEAS AND THE MIND: Blueprints must come from a mind in the form of ideas as they are conceptual in nature and the pictures and words on the blueprint represent the physical reality. Mathematics as well is a field of study of the relationship of numbers and is also conceptual, just like blueprints are as well. Although detailed blueprints can be physically made, they are generated from the mind of the author.

DNA AS A BLUEPRINT

DNA in living things is the blueprint of life. “The sequence of the human genome represents our genetic blueprint.”

Joel C. Eissenberg, Prof. of Biochemistry and Molecular Biology, St. Louis University. Eissenberg JC. Epigenetics: modifying the genetic blueprint. Mo Med. 2014 Sep-Oct;111(5):428-33.

If DNA is the blueprint for living things, and blueprints are conceptual by nature, then blueprints and DNA must come from a mind. Consider the following working backwards from the physical feature to the mind.

The Physical Feature	The Blueprint Stage	Ideas in a Mind	The Architect
Step 4. The Sydney Opera House	Step 3. Many pages of blueprints	Step 2. The mind of the architect	Step 1: The Danish architect Jørn Utzon
			
Step 4. The building: A Giraffe	Step 3: DNA in 30 chromosomes	Step 2: The mind of a planner	Step 1: The maker of the Giraffe
			
Step 4: Humans	Step 3: DNA in 46 chromosomes	Step 2: The Mind of a Planner	Step 1: The maker of humans
			

However, atheists who claim that Evolutionary changes by materialistic and naturalistic explanations discount any type of Divine involvement. Evolutionary genetics are a matter of inheritance and random mutation over geologic time acted upon by Natural Selection.

Prof. Richard Lewontin (1929–2021), Harvard University, Leading Evolutionary Geneticist wrote

“It is not that the methods and institutions of science somehow compel us to accept a material explanation of the phenomenal world, but, on the contrary, that we are forced by our a priori adherence to material causes to create an apparatus of investigation and a set of concepts that produce material explanations, no matter how counter-intuitive, no matter how mystifying to the uninitiated. Moreover, that materialism is absolute, for we cannot allow a Divine Foot in the door.”

An atheist would see an organism like a human being and know that they have 46 chromosomes which have the instructions for building a human, but they would deny that there is any sort of mind of a Creator who made living things as in the following:

Humans	DNA in 46 chromosomes	The Mind of a Planner	The Maker of humans
			

The likelihood of chance creating human life based on simply the many types of proteins that humans have based on chance is staggeringly small. What is the probability that humans just arrived on earth by chance based on proteins alone?

So Geneticist Richard Lewontin speaks of his prior commitment to not allow God to be the mind behind the DNA blueprint. However, this is the dilemma which Atheists have - how does a mindless process - Naturalism and chance - create a blueprint? Is this in any way plausible?

One may well argue that this belief above is not plausible logically and thus Atheism is a nonsensical position based on DNA being a blueprint and conceptual in nature.
